Murhula Shemeki Anicet

Software Engineer

+250786094247 | anicetmurhula20@gmail.com | Kigali, Rwanda | Portfolio

---

I'm a Software Engineer with 5+ years of industry experience, focused on building and shipping production-grade web and mobile applications. I have hands-on experience with the full SDLC and enjoy architecting systems from the ground up. I thrive in remote-first environments and have a passion for mentoring junior developers. When I'm not coding, you'll find me lifting weights or playing video games.

PROFESSIONAL EXPERIENCE

Frontend Developer | RushHour - USA, New Jersey - Remote April 2025 - Present

- Built RushHour from the ground up using React Native, Expo EAS, TypeScript, and Redux now live on the App Store and Google Play across the USA.
- Integrated Google Maps API for real-time route tracking and built REST API consumption layers against a .NET backend.
- Contributed to the RushHour web admin portal built with Vue.js, ensuring data consistency across mobile and web platforms.
- Technologies: React Native, Expo EAS, Vue.js, TypeScript, Redux, .NET API, Google Maps API, GitHub Actions

Full Stack Developer | Ever Technologies - Bulgaria, Sofia - Remote April 2025 - Jun 2026

- Contributed to backend and frontend development for the Ever Gauzy Platform, an open-source enterprise platform combining ERP/CRM/HRM/ATS/PM functionalities.
- Designed and implemented third-party integrations with automation tools including Make.com, Zapier, SimStudio, and ActivePieces, expanding platform workflow automation capabilities.
- Built the Ever-Gauzy piece on ActivePieces and implemented the MCP Server, enabling AI assistants to interact with Gauzy APIs through standardized tool calls.
- Technologies: NestJS, Strapi CMS, NextJS, PostgreSQL, Redis, Docker, React, Angular

Senior Frontend Developer | DevInterface - Verona, Bussolengo, Italy - Remote April 2024 - February 2025

- Led mobile and frontend development for client projects, architecting cross-platform applications with React Native and building scalable frontend interfaces with Angular.
- Owned the mobile release pipeline end-to-end, managing App Store and Google Play deployments through Expo EAS and GitHub Actions CI/CD workflows.
- Drove architecture and design decisions across the frontend stack, prioritizing code quality, testability, and long-term maintainability while mentoring team members on best practices.
- Technologies: React Native, Angular, TypeScript, Expo EAS, GitHub Actions

Senior Frontend Developer | Ngeni Labs - Nairobi, Kenya January, 2023 – May, 2024

- Architected and deployed decentralized applications (dApps) using Solidity smart contracts, Web3.js, and blockchain integrations across multiple EVM-compatible networks.
- Built frontend interfaces for DeFi protocols and token-based reward systems, enabling seamless wallet connectivity and on-chain transaction flows.
- Implemented and improved the authentication mechanism, which reduced sign-in delay by 50%.
- Technologies: Solidity, Web3.js, React, Next.js, Node.js, NestJS, MongoDB, TypeScript

Full-Stack developer | Freelance - Upwork July 2020 - December 2022

- Delivered end-to-end web and mobile solutions for international clients, handling architecture design, development, and deployment on the Apple App Store and Google Play Store.
- Mentored 10+ aspiring developers through Microverse's online coding program, helping them secure their first roles in tech.

AREAS OF EXPERTISE

Frontend: React, Angular, NextjS, VueJs
Backend: NodeJs, Nestjs, Express, MongoDB, Laravel, Solidity.
Tools & Practices: Git, GitHub, Vercel, Agile, TDD, CI/CD, Jira, Github actions,Expo EAS, Kubernetes,RabbitMQ, Jenkins, AWS, AI automation workflows

PROJECTS

- RushHour: App Store | Google Play Official driver mobile app for Shimon's Express, a U.S.-based logistics company. Built from scratch and live across the USA, powering real-time route management, HOS compliance, DVIR inspections, and dispatch communication.
- MovePay: A B2B and B2C payment application in Germany, providing a secure and simplified payment solution for everyday transactions and financial management for users and merchants.
- Cloc-ai An open-source, self-hosted and cloud-hosted productivity and time tracking platform for teams and organizations.
- Ever-Gauzy An open-source ERP/CRM/HRM/ATS and Project Management platform. Contributed to backend services, API development, third-party integrations, and the MCP Server for AI assistant interactions.

EDUCATION

INDEPENDENT UNIVERSITY OF KIGALI — Kigali, RWANDA
Bachelor of Engineering, Major in Computer Science and Mathematics — 2019-2022

ADDITIONAL INFORMATION

- Strong problem-solving and analytical skills
- Excellent communication and team collaboration
- Languages: English, French, Swahili, Kinyarwanda
